## SMART Boards and Accessories

The SMART Board range

SB640 SMART Board (48" or 121.9cm diagonal)  
SB660 SMART Board (64" or 162.6cm diagonal)  
SB680 SMART Board (77" or 195.6cm diagonal)

- The SB660 is the most popular size for a standard classroom & boardrooms

The SMART Boards can be linked via the Bridgit web based conferencing and via the Polycom video conferencing systems.

### Smart USB Speakers

Twin, powered and amplified USB speakers designed to mount on each side of SMART Board

### Mobile Stands

We have mobile stands for the SMART Boards

### Training

A5 Flip guide on "how to" use SMART Boards

### Acer P1265 DLP Data Projector

2,400 ANSI Lumens,  
2000:1 Contrast Ratio,  
XGA 1280 x 1024 native resolution,  
DVI Input,  
Keystoning +/-16 degrees,  
Weight 2.17kg  
Two year warranty

### Projector Cage and Ceiling Mount

Gilkon Security Cage for Projectors  
Keylock on pole and rear door of cage  
Interchangeable side/front panels  
400 x 350 x 150 mm (L x W x H)  
15 kg Weight Capacity  
Round pole with white Finish

**We sell, service and support your business office needs**

### **Gilkon Ceiling Mount Kits**

If your SMART Board is wall mounted, a ceiling mount will ensure the projector stays aligned to the SMART Board and allow easier operation as the projector will project from above the arm of the user. Kits consist of a standard round section, telescopic pole with a mounting plate to suit the particular model of projector (please specify projector model when ordering)

### **Wallmount kit for projector**

For rooms with ceilings over 3.5m high, we recommend the use of a wallmount kit which is bolted to the wall above the SMARTBoard with a pole extending approximately 2.7m from the wall. We install a safety chain from the outer end of the pole to a secure beam in the ceiling above – just in case someone decides to swing on the pole!

### **Cables**

10 metre high resolution, shielded VGA cable to connect your PC and the ceiling mounted projector (not just an ordinary computer VGA cable)

Note: Cables other than 10m available but over 10m may result in loss of signal and give a poor quality image. VGA boosters are available for use on long cables.

10 metre Composite Video (RCA) cable for video, DVD's etc

### **VGA Splitter**

Powered, two-way, VGA splitter box to simultaneously run a monitor & projector and 2m M/F high resolution VGA cable

The splitter box is required if using a standard computer rather than a notebook or laptop. A non-powered splitter cable to give two VGA outlets will invariably result in poor image quality, ghosting etc at the projector as the splitter cable effectively halves the signal strength to each device. Unless teachers/presenters are very confident using a computer, we strongly recommend the use of a local screen (notebook or PC monitor) so files can be found and loaded without everyone watching!

### **Digital Microscope**

Digital Blue QX5 Digital microscope

10X, 60X and 200X zoom

Turret is removable for viewing surface of large objects (plants, animals etc)

Image capture, time lapse and video recording with software supplied

Annotate over images and save with SMART Board software.

### **Wireless Mouse & Keyboard Suite**

Gyratation wireless optical mouse & keyboard suite with 10m plus range

### **Wireless Slate**

Bluetooth wireless slate complete with Bluetooth Adaptor for your PC to integrate with SMART Boards

### **Installation**

Room with high ceiling (over 3.5m) usually wallmount bracket

Room with ceiling less than 3.5m with ceiling pole of appropriate length

### **Other Interactive Whiteboards.**

You may be offered many different brands of interactive boards. You are only legally entitled to use the SMART software on a SMARTBoard (you can install as many copies of the software as you wish once you purchase a board). The SMART software is constantly being developed and improved – it stands head and shoulders above that supplied with other boards (often at an extra & even sometimes, an annual cost)

### **Video Conference Equipment**

We also supply and install video conference equipment which can share SMART Boards in a conference.
